# Quick & Professional with Profile Boxes

## Thematic profiles for efficient application

The usability of BuildingScout is as easy as other apps, at the same time visual as well as issue-specific support at a high level are the true benefits. Using digital building plans and modules with various profiles for each use case, non-specialists receive guidance, the process is speed up due to quick selections, and content and documentation is effectively structured.

## Quick Selection & Individual

Depending on the use case a thematic profile is assigned to each Data Point that can be completed with an evaluation and further information. Playfully Data Points can be used further or assigned flexibly to users.

## Use Cases

- 
**Environment**  
 Emissions, Energy, Waste, Soil, Water, Emergency Preparedness  
 Relevant aspects for corporate environmental management (e.g. EMAS, ISO 14001)
- 
**Safety**  
 Groups of occupational safety risks and hazardous materials  
 Compliance-Checks and work on important safety issues.
- 
**Building-Check**  
 Building Structure, Components, Areas, Sustainability Criteria etc.  
 Checks of the building's status: qualitative assessment, due diligence, energetic evaluation
- 
**Energy & CO<sub>2</sub>**  
 Energy consumers, building components and systems, processes, work stations  
 Energy savings are possible everywhere: e.g. lightings. HVAC, compressed air, pumps, work stations, insulations, measuring points
- 
**Crowd**  
 Involving many actors in a project or all staff members permanently  
 All users of a building or responsible persons can be integrated or communicate issues through the system
- 
**Basic**  
 Introduction into Environment & Sustainability, Safety, Energy & Climate Protection, Machines & Defects, Hygiene, Office Supplies
